

# ANSH RAI

Greater Noida, Uttar Pradesh

+91-9451853908    anshrai922@gmail.com    LinkedIn    GitHub

## SUMMARY

Java Backend Developer with strong foundation in Core Java, Spring Boot, REST APIs, Kafka, SQL, and OOP concepts. Experienced in backend development, scalable application design, and API development. Passionate about building efficient, reliable, and high-performance software solutions.

## EDUCATION

**Galgotias University, Greater Noida**

**2021 – 2025**

*B.Tech in Computer Science and Engineering – CGPA: 8.01*

*Greater Noida, India*

## COURSEWORK / SKILLS

- |               |                 |                     |                   |
|---------------|-----------------|---------------------|-------------------|
| • Core Java   | • Apache Kafka  | • OOP Concepts      | • Postman         |
| • Spring Boot | • SQL           | • Git & GitHub      | • HTML/CSS        |
| • REST APIs   | • Microservices | • Agile Methodology | • Problem Solving |

## EXPERIENCE

**Infosys**

**2025 – Present**

*System Engineer – Java Backend Domain*

*Mysore, India*

- Working on Java backend development using Spring Boot and REST APIs.
- Developing and maintaining scalable backend services and enterprise applications.
- Worked with Apache Kafka for event-driven communication and messaging workflows.
- Designed and consumed RESTful APIs for microservices-based applications.
- Collaborated in Agile development environment with version control using Git & GitHub.
- Performed debugging, code optimization, and backend issue resolution.

## PROJECTS

**Fitness Tracker Web App** | HTML, CSS, JavaScript, Firebase

- Developed modules for workout tracking, BMI calculation, and user authentication.
- Integrated Firebase for authentication and real-time database storage.
- Implemented responsive UI and optimized application workflows.

**Image Steganography Web App** | HTML, CSS, JavaScript, Firebase

- Built a secure web application for image-based message encryption and decryption.
- Implemented file upload, hidden message embedding, and extraction features.
- Integrated Firebase backend for authentication and secure data handling.

**Botnet Detection System** | Python, Machine Learning

- Developed an ML-based system for detecting malicious botnet traffic patterns.
- Analyzed network traffic data and performed classification using machine learning algorithms.
- Improved detection accuracy through data preprocessing and feature engineering.

## PROGRAMMING SKILLS

**Languages:** Java, Python, SQL, Bash

**Backend:** Spring Boot, REST APIs, Microservices, Apache Kafka

**Tools:** Git, GitHub, Postman, Maven

**Web:** HTML, CSS, JavaScript

**Databases:** MySQL, Firebase
